## [Certification and Core Review for Neonatal Intensive Care Nursing \(Watson & Diehl, 2017\)](#)

*Get ready for your neonatal intensive care nursing certification exam with the only review developed in collaboration with three leading nursing organizations! From AACH, AWHONN and NANN, Certification and Core Review for Neonatal Intensive Care Nursing, 5<sup>th</sup> edition, prepares you for your examination with hundreds of high-quality study questions and realistic test simulation. Based on the latest test plans of the AACN's CCRN-Neonatal exam and the NCC's Neonatal Intensive Care Nursing (RNC-NIC) exam, review questions cover the changes to the Core*

*Curriculum and reflect the latest evidence, essential knowledge and best practices. New to this edition are three new chapters and 225 completely new review questions. This powerful study tool offers unparalleled preparation for your certification exam!*

## [Basic, High-Risk and Critical-Care Intrapartum Nursing \(AWHONN, 2019\)](#)

*This new resource is written for all perinatal clinicians who provide care to pregnant women, whether they identify, stabilize and transfer or care for the woman with high-risk or critical care conditions. This book provides information needed to plan and promote safe effective care for women with complex conditions. Fully updated content includes new chapters on maternal morbidity and mortality, strategies to improve maternal outcomes, critical care development strategies, volume resuscitation, triage, morbidly adherent placenta, and more.*

## [Demystifying Opioid Conversion Calculations: A Guide for Effective Dosing \(2018\)](#)

*A comprehensive revision and update of this popular opioid reference. Covers the spectrum of opioid analgesics used in the management of patients with moderate to severe pain and serious/ life-limiting illnesses. Includes a new chapter, “Drug Shortages: Calculations and Conversion for Opioid Alternatives.”*

## [Comprehensive Care of the Transgender Patient \(Ferrando, 2020\)](#)

*From a renowned expert at the Cleveland Clinic and medical and surgical experts in this growing field comes an up-to-date, multidisciplinary resource on transgender health care and surgery. Comprehensive Care of the Transgender Patient covers all aspects of transgender health care, beginning with epidemiology and history and progressing to an in-depth review of the complex transitions for patients, including mental health services, endocrine and hormone therapy treatment, and surgical options.*

## [Mastering Precepting \(Sigma Theta Tau, 2019\)](#)

*Nurse preceptors have the power and opportunity to inspire nurses to achieve greatness. Effective precepting programs depend on two critical groups: nurses who organize and manage the programs and nurses who support, teach and coach. Author, Beth Ulrich provides the knowledge, tools, skills and wisdom both groups need for success. Written for staff nurses and their managers, this second edition of Mastering Precepting: A Nurse's Handbook for Success teaches preceptors both the science and art of education and empowers them to seek the support they need to be effective. For managers, it emphasizes the importance of providing preceptors with positive and supportive experiences. This fully revised new edition covers: Roles, planning, goals and motivation, specific learner populations, self-care and burnout precautions.*

## [Guidelines for Perioperative Practice \(AORN, 2019\)](#)

*AORN's Guidelines for Perioperative Practice provide direction for achieving excellence in perioperative patient care and workplace safety. These evidence-based guidelines are intended for use by perioperative professionals to promote safety and optimal outcomes for patients. The guidelines are available for individuals or teams within facilities or multi-site health care systems.*

## [Perioperative Care of the Pregnant Woman \(AWHONN, 2019\)](#)

*This guideline provides recommendations for the care of pregnant women undergoing surgical procedures. The evidence-based approach includes a review of safety measures when caring for pregnant women needing surgery during pregnancy, as well as specific sections focusing on preoperative, intraoperative and postoperative recommendations for surgical birth.*

## [CMSA Core Curriculum for Case Management \(Tahan & Treiger, 2017\)](#)

The fully updated CMSA Core Curriculum for Case Management, 3<sup>rd</sup> edition, is the definitive roadmap to an informed, effective, collaborative Case Management practice. This comprehensive, expertly-written guide provides those directly or indirectly involved in case management with information about best practices, descriptions of key terms, essential skills, and tools that fulfill the current CaSe Management Society of America's (CMSA) standards and requirements. Addressing the full spectrum of healthcare professional roles and environments, this is both a crucial certification study guide and vital clinical resource for the case management professionals in all specialty areas, from students to veteran case managers.

# NEW FOR YOU ON R2

Fall 2019

## [Lutz's Nutrition and Diet Therapy](#) (Mazur, 2019)

*Meet the ever-changing demands of providing quality nutritional care for patients across the lifespan. This popular text provides a strong foundation in the science of nutrition and a clear understanding of how to apply that knowledge in practice, recognizing the need for nurses to work with other healthcare professionals to ensure optimal nutrition in patient care.*

## [Management and Leadership for Nurse Administrators, 8<sup>th</sup> ed](#) (Roussel, 2020)

*To succeed as leaders of a diverse, multigenerational workforce, nurse managers and executives need to have both traditional management skills and a contemporary, creative mindset. Management and Leadership for Nurse Administrators, 8<sup>th</sup> ed, is a comprehensive overview of key management and administrative concepts that are critical to leading healthcare organizations and ensuring patient safety and quality care. The text prepares nursing students and professional administrators to lead a workplace that is rapidly evolving due to technology, culture and changes in the U.S. healthcare system. The text features an updated discussion of the business of healthcare, including resource procurement, revisions to the Affordable Care Act, and financial management leading to reimbursement. It also focuses on transformational leadership principles, such as how leading with emotional intelligence can foster communication, conflict resolution, team building, and joy in the workplace. New to the 8<sup>th</sup> edition: Employing polarity thinking to embrace problems, conflict, and resistance in health care; Using implementation science to promote sustainable quality improvement and move toward the IHI Quadruple Aim; New content on management strategies for mentoring and coaching a diverse working staff. Features crosswalks for major content areas and competencies from AONE, ACHE and other professional organizations.*

## [Nursing Diagnosis Manual \(Doenges, Moorhouse, & Murr, 2019\)](#)

*Assessment tools to help you select the appropriate diagnosis. Alphabetized monographs for hundreds of diseases and disorders reflecting all specialty areas. Associated nursing diagnoses that are presented by priority and written as client problem/need statements. NIC and NOC linkages with each diagnosis. Unique presentation of each action/intervention by priority with rationales with icons for cultural, collaborative, diagnostic studies, medications, community/home health, pediatric/geriatric lifespan. Documentation section that emphasizes the importance of what and why. Taxonomy information that defines the domain in which the nursing diagnosis belongs, along with the date the nursing diagnosis was approved or revised. Pediatric considerations in the monographs, where appropriate. References to support evidence-based practice.*

## [Nursing Care and Management of the Second Stage of Labor \(AWHONN, 2019\)](#)

The third edition of this evidence-based guideline is a must-have for nurses working in any birth setting. This guideline provides updated and detailed practice recommendations for assisting women through the second stage of labor based on the best available evidence. It emphasizes the value of non-directed, open glottis pushing and upright positioning as essential nursing practice interventions that support the normal, physiologic practice of labor. The third edition also includes a section highlighting how this guideline was implemented and helped to improve outcomes for women during the second stage of labor. This evidence based guideline was developed by nurses for nurses with comprehensive review of the literature from multiple disciplines including nursing, medicine, and the behavioral health sciences.

## [Assessment and Care of the Late Preterm Infant \(AWHONN, 2017\)](#)

Assessment and Care of the Late Preterm Infant provides evidence-based practice guidelines from AWHONN needed to care for these special patients.
