

#CrouseStrong

We have taken these steps to **keep you safe** and **reduce your risk of COVID-19**

Social distancing

- When not directly providing care we keep our distance.
- Our waiting room encourages no one sitting close to you.
- Our appointment times have increased to reduce overcrowding and allow time for more cleaning.
- Come to visit us alone unless you need assistance—the fewer visitors the better protection for everyone.

A mask for all staff and visitors

- We wear masks to protect others; for this reason we ask that everyone wear a mask.

Frequent cleaning and hand washing by all employees

- Strict adherence to cleaning and disinfecting of equipment between each patient
- We welcome patients/visitors to use our hand sanitizers and talk to staff about hand washing.

Everyone—including staff and patients/visitors—is screened for respiratory illness

- You will be asked screening questions and have your temperature taken before entering.
