

# YOUR MATERNITY CARE... IN OUR HANDS

## Safety Conducts drills and skill simulations with a multidisciplinary team approach to facilitate learning and prepare for obstetric emergencies

## Quality Improvement

Participates in quality improvement initiatives to provide up-to-date evidence-based care to patients

### Emergency Transfers

Partners with other regional facilities to provide safe transfer in emergent situations for appropriate higher levels of care for maternal & newborn critical needs

#### Community Needs

Maintains a written community needs assessment plan in place to reduce racial disparities and address the ongoing needs of the community

## Evaluation

Offers the service of in- house autopsy for the parents who have delivered a stillborn infant and requests the evaluation

## Bereavement Support

Provides bereavement support services for patients and their families who have suffered a still birth or any fetal loss
